

Huawei Challenge: Imagine What's Next

HackYeah 2026 Task Partner Challenge Rules

1. About the Challenge

Huawei Polska sp. z o.o., ul. Domaniewska 39A, 02-672 Warsaw, Poland ("Huawei"), organizes the **Huawei Challenge: Imagine What's Next** (the "Challenge") as a Partner Competition within **HackYeah 2026**, taking place on 3–4 October 2026 at Tauron Arena Kraków.

Huawei is the organizer of the Challenge and funds the prizes awarded in the Challenge. PROIDEA sp. z o.o. ("PROIDEA") is the organizer of HackYeah 2026 and provides the organizational framework and the submission platform for the Challenge. PROIDEA pays the prizes to the winners on behalf of Huawei, using funds provided by Huawei under the partnership arrangements. Huawei remains responsible for these Challenge Rules, the evaluation of submissions and the selection of winners. PROIDEA does not participate in the substantive evaluation of submissions or the selection of winners.

These Challenge Rules supplement the general **HackYeah 2026 Rules**. All matters not specifically covered by these Challenge Rules are governed by the HackYeah 2026 Rules.

Participation in the Challenge is open only to registered HackYeah 2026 participants and implies acceptance of these Challenge Rules.

2. Challenge objective

The objective of the Challenge is to create an innovative **mobile feature or application for the HarmonyOS ecosystem** that demonstrates new ideas and possibilities enabled by a new generation of operating systems.

The detailed Challenge description, including technical requirements and suggested areas of exploration, will be published on the HackYeah website (www.hackyeah.pl) on 3 October 2026, at the time indicated in the official HackYeah 2026 schedule.

Participants are encouraged to experiment, create original concepts and demonstrate a working prototype or other convincing implementation of their idea.

3. Teams

Participants may compete individually or in teams of up to 6 people. References to a "team" in these Challenge Rules apply accordingly to a Participant competing individually.

Only persons registered as HackYeah 2026 participants may be members of a team.

Persons directly involved in organizing or evaluating the Huawei Challenge may not participate in the Challenge.

4. Challenge duration and submissions

The Challenge follows the official **HackYeah 2026 schedule** published by PROIDEA.

Solutions must be submitted before the official submission deadline through the platform specified by HackYeah.

The detailed submission requirements will be provided together with the Challenge description. They may include a project description, presentation, screenshots, demo, prototype, source-code repository or other materials necessary for the Jury to evaluate the solution. All submissions, presentations, demonstrations and project documentation submitted for evaluation must be prepared in English.

Submissions received after the deadline will not be considered.

The submitted solution should be created or substantially developed during the Challenge. Participants may use existing tools, frameworks, libraries, open-source software and other third-party components, provided that their use complies with the applicable licences and third-party rights.

Participants may use generative AI tools, AI coding assistants, pre-existing code, templates, boilerplate and other materials prepared before the Challenge, provided that they are legally entitled to use such materials. The requirement that the solution be created or substantially developed during the Challenge refers to the solution as a whole and does not exclude the use of such materials. Participants shall identify material pre-existing or third-party components, as well as the use of AI tools, in their submission documentation.

5. Jury and evaluation

Solutions will be evaluated by a Jury appointed for the Huawei Challenge.

Each Jury member assesses each submission on a scale of 1 to 10 under each of the criteria listed below. The final score of a submission is the weighted average of these assessments, calculated using the weights indicated below and averaged across all Jury members:

- originality – 20%;
- demonstrated usefulness of the proposed solution – 20%;
- technical execution – 20%;
- use or enhancement of platform capabilities – 20%;
- quality of the demonstration – 10%;
- reproducibility and transparency of the development workflow – 10%.

For the Huawei Challenge, the evaluation criteria specified in this Section 5 replace the general evaluation criteria specified in point 5.5 of the HackYeah 2026 Rules.

The Jury may invite selected teams to present or demonstrate their solutions.

The Jury's decisions are final.

The Jury may decide not to award one or more prizes if the submitted solutions do not reach an adequate level of quality, in particular where the solution that would qualify for the respective prize does not achieve at least 50% of the maximum possible final score.

6. Prizes

The total prize pool for the Huawei Challenge is **PLN 25,000**:

- **1st place – PLN 12,000**
- **2nd place – PLN 8,000**
- **3rd place – PLN 5,000**

The results of the Challenge will be announced on 4 October 2026 during the HackYeah 2026 closing ceremony. Each monetary prize is awarded jointly to the members of the awarded team, as indicated in the team's submission, and is divided equally among them. The prizes are paid by PROIDEA sp. z o.o. to the bank accounts indicated by the individual team members within 60 days from the announcement of the results, provided that the team members have supplied the data necessary to make the payment and to fulfil the related tax obligations. If such data is supplied later, the 60-day period runs from the date on which it is supplied.

The amounts of the prizes are reduced by any taxes, contributions and fees due in accordance with applicable law.

7. Intellectual property

Participants retain ownership of the intellectual property rights they hold in their submitted solutions. Huawei does not acquire any rights to the submitted solutions other than those expressly set out in this Section.

By accepting a prize, each member of an awarded team grants Huawei Polska sp. z o.o. and Huawei Technologies Co., Ltd. a non-exclusive, royalty-free licence, without territorial limitation, for a period of 3 years from the announcement of the results, to use the awarded solution for the purposes of evaluating and testing it, demonstrating and presenting it (including at conferences, trade fairs and other events), and promoting the Challenge, HackYeah and the HarmonyOS ecosystem, in the following fields of exploitation:

- a) fixation and reproduction of the solution by any technique, including digital technique, as well as installing, running and storing it on devices and in IT systems;
- b) public display, presentation and performance of the solution, including in recorded form;
- c) making the solution, its description, screenshots and recordings of its operation available to the public in such a way that anyone may access them at a place and time of their choosing, as well as broadcasting and rebroadcasting;
- d) translation, adaptation and other modification of the solution, including its user interface, solely to the extent necessary to run, demonstrate or present it on other devices, other software versions or in other languages for the purposes referred to above; the results of such modifications may be used only in the fields of exploitation listed in points a) to c), for the same purposes and for the same term.

The licence does not include the right to commercially exploit the awarded solution, to distribute it as a product or service, or to integrate it into Huawei products or services. The licence covers the awarded solution only to the extent of the rights held by the members of the awarded team and does not extend to pre-existing or third-party components, which remain subject to their own licences.

The licence does not transfer ownership of the solution or of any intellectual property rights to Huawei. The members of awarded teams remain free to use, further develop and commercialise their solution and to grant any rights to it, including exclusive rights, to third parties, without prejudice to the licence granted to Huawei under this Section.

Huawei may invite members of awarded teams, as well as of other teams whose solutions are of particular interest, to discuss possible further cooperation, such as promotion of the solution in the HarmonyOS ecosystem, technical collaboration or commercial licensing. Any such cooperation would be subject to a separate agreement. These discussions are voluntary and do not create any obligation for either party.

Participants are responsible for ensuring that their submissions do not infringe third-party rights and that any third-party or open-source components are used in accordance with their applicable licences.

For the purpose of documenting and promoting the Challenge and HackYeah, each Participant who submits a solution grants Huawei and PROIDEA sp. z o.o. a non-exclusive, royalty-free licence, without territorial limitation, for a period of 3 years from the announcement of the results, to use the project name, team name, project description, screenshots, presentation materials and recordings of the project demonstration in communications relating to the Challenge and HackYeah, in the fields of exploitation listed in points a) to c) above.

8. Fair participation

Huawei may disqualify a team if it:

- violates these Challenge Rules or the HackYeah 2026 Rules;
- submits a solution after the deadline;
- provides false or misleading information;
- infringes third-party rights;
- engages in fraud or other conduct that could compromise the fairness of the Challenge.

9. Changes and final provisions

Huawei may amend these Challenge Rules only for important reasons, in particular changes in applicable law, technical failures, force majeure or other circumstances beyond Huawei's reasonable control. Amendments may not adversely affect rights already acquired by Participants, reduce the announced prize pool or change the amounts of individual prizes, or change the evaluation criteria or their weights after the publication of the detailed Challenge description. Any amendment becomes effective only upon its publication on the HackYeah website (www.hackyeah.pl) and through the official HackYeah communication channels.

In all matters not regulated by these Challenge Rules, the HackYeah 2026 Rules apply.
